

**Note re questions 2-9 and 33-38.**

Questions 2-9 and questions 33-38 ask for people who **completed their enrolment** and **voted** on the same day. We cannot give this because:

- Our systems do not show when enrolments taken at voting places were actually taken.
  - An enrolment taken at a voting place (VP) gets a “date received” tag only once it is scanned into our system.
  - Enrolments taken at VPs do not necessarily get scanned in on the same day they are taken.
  - And our system does not track the date the physical form was received at a voting place.
  - So the date an enrolment is actually taken does not necessarily equal the “date received” that our system attribute to each enrolment once it is scanned in.
  - So we cannot know whether any enrolment was actually taken on the day it shows up as “received” by our system
- Further complication: a vote with an enrolment is a special vote which leads to further complications with connecting the person who cast the vote to their enrolment.

So we can say how many people enrolled and did [x enrolment action]. Cannot say which day exactly they enrolled on and, of those who enrolled, we cannot say for certain that they voted (though we assume that the large majority of them did).

We have however provided the total number of enrolments for the various breakdowns requested (for the full voting period), unless precluded from doing so by another part of each question.

## 2023 General Election Special Votes by General Electorate, Age & Māori Descent

### Technical Notes

As with all data published by the Electoral Commission, we urge users to use the data ethically and remember that this data represents real people in New Zealand.

This data contains special vote statistics by electorate, age group, and descent. The total numbers of special voters in these datasets are slightly lower than in the official results because of disallowed votes, dual votes, clerical errors made in scanning or marking the master roll, and where an elector's demographics could not be determined.

Breakdowns with less than 20 special votes are confidentialised and shown as blanks.

Electors on the Māori roll are included in the statistics for the general electorate they live within to give a geographic breakdown.

Overseas electors are included in the neighbourhood of their enrolment registration address in New Zealand. This will be the address the overseas elector last lived in for 1 month or more.

The split of advance and election day voting with demographics is only available for ordinary votes, and not special votes.

Although the utmost care has been taken in the preparing and presentation of this data, mistakes do happen. If you see an error or something that does not look right, please let us know by emailing [enquiries@elections.govt.nz](mailto:enquiries@elections.govt.nz).

### Data definitions

**General Electorate** - the name of the general electorate, using the 2020 General Electorate boundaries. Electors who live within the general electorate boundaries are included with the general electorate, regardless of if they are on the Māori roll or General roll.

[For more information on electorates visit: What is an electorate? | Elections](#)

**Māori Descent** - An electors' descent as indicated on their enrolment form.

**Age** - the elector's age as at election day in the 2023 general election.

**Special Votes** - the number of special votes cast by electors, not including disallowed votes, dual votes, or clerical or scanning errors.

**Advance Votes** - the number of ordinary votes cast prior to election day, not including disallowed votes, dual votes, or clerical or scanning errors.

**Election Day Votes** - the number of ordinary votes cast on election day, not including disallowed votes, dual votes, or clerical or scanning errors.

## Special Votes

## Statistics on Elector Enrolment During the 2020 & 2023 General Election Voting Period

### Technical Notes

As with all data used by the Electoral Commission, we urge users to use the data ethically and remember that this data represents real people.

The 2023 counts are of enrolled electors who were on the roll as of election day (14/10/2023) for the 2023 General Election. Enrolments counted for the voting period include any enrolment received via paper form or digital enrolment from an elector from 02/10/2023 - 14/10/2023.

The 2020 counts are of enrolled electors who were on the roll as of election day (17/10/2020) for the 2020 General Election. Enrolments counted for the voting period include any enrolment received via paper form or digital enrolment from an elector from 03/10/2020 - 17/10/2020.

Electors enrolling or updating enrolment details during the voting period may have done so within the voting place or online prior to voting.

The total number of enrolments in this table will not match total enrolments taken or processed during the voting period (total processed is 453,940) as it is counting eligible electors (distinct people). Duplicates, multiple enrolments for one elector, and enrolments from people not eligible are not included in these statistics.

Not all of the electors with voting period enrolments will have needed to cast a special vote, as some would not have impacted voting rights.

The counts do not include electors who were not enrolled on election day that attempted to vote (disallowed votes for not being enrolled or eligible).

As a small number of data patches have been applied since the 2020 general election, the total number of electors is slightly higher than in the official results.

Although the utmost care has been taken in the preparing and presentation of this data, mistakes do happen. If you see an error or something that does not look right, please let the Data and Insights Team know.
