Projected populations

Population projections for 2026 and 2029 have been provided by Stats NZ. Percentages for population projections are rounded to one decimal place.

The 2026 and 2029 percentage figures are the projected percentage difference in electoral populations from the projected quota in October 2026 and 2029 for each electorate. They are based on assumptions made about future fertility, mortality and migration patterns. Although the assumptions are formulated carefully to represent future trends, they are subject to uncertainty, with less reliability for 2029 than for 2026.

More information about the mathematics of the electorate allocation and the methodology used to produce the electoral population projections can be found at stats.govt.nz.
